CHRISTOPHER MUNGIRIA
3RD YEAR COMPUTER SCIENCE MAJOR

OBJECTIVE
My objective is to learn on improving the workspace through teamwork and collaboration with others

SKILLS & ABILITIES
I have software engineering experience with web languages (HTML, CSS, PHP, JS) as well as object-oriented languages C++ and Java. I have also worked with Unity and Unreal Engine in my path of game development to create and recreate simple 2D games such as the popular Flappy Bird. I believe that some or all of these skills may be useful in the workspace.

EXPERIENCE

SENATE BUILDING
NOVEMBER 2018
In November 2018, I volunteered to work in the National Senate under the legal department. Voluntary service was offered in high school at the time, and I took the opportunity to serve for three weeks.

EDUCATION

STRATHMORE UNIVERSITY
I am a current 3rd year student at Strathmore University, pursuing Bachelor of Informatics and Computer Science. My current average is B (65.68).

STAREHE BOYS' CENTRE AND SCHOOL
I completed my high school studies in 2019, with an average of B+ (68). I was a member of the swim team and the table tennis team. By the time I was completing my studies, I managed to be a house captain in charge of 88 students, who were under my care. I was also in the St. John's Ambulance cadets, and I served as a sergeant in charge of public duty. I joined the Tech-hub club which was launched in 2017. This is where I had my first interaction with programming. I learnt Java, C++ and web development through the club. I was the liaison officer by the time I completed high school.

LEADERSHIP
I served as a prefect and rose to become house captain in form 4. My duties included caring for 88 students and ensuring physical house cleanliness as well as keeping the house spirit.

During this time, I also served as a sergeant in St. John's Ambulance cadets. In my capacity, I oversaw selection of cadets to serve as first aid responders in school sport events and evaluation of their duties.

Furthermore, I was the liaison officer in Tech-hub, which is a club oriented around tech education for high school students. My duties included, involving companies to outreach and support the club through. I have learnt a lot through my experiences and look forward to gaining more skills, knowledge and friendships.
